

ABOUT ME

Data Analyst with 1+ year of experience in transforming data into meaningful insights and supporting data-driven decision-making. My primary focus is on Excel, Power BI, SQL, and Python, with hands-on experience in data cleaning, EDA, KPI reporting, and dashboard development. I enjoy uncovering patterns, simplifying information, and building dashboards that communicate insights effectively. Through projects involving sales, inventory, and performance analytics, I continue to strengthen my expertise in data and storytelling.

SKILLS/TOOLS

- SQL (Joins, Window Functions, CTEs, Subqueries)
 - Python (Pandas, NumPy, Matplotlib, Seaborn)
 - Power BI (DAX, Data Modeling, Dashboard Development)
 - Microsoft Excel (Pivot Tables, Power Query, VLOOKUP)
- Tableau (Dashboard Development)
 - Jupyter Notebook
 - Data Cleaning & Data Validation
 - Data Visualization & Reporting
 - Exploratory Data Analysis (EDA)
- Business Analysis
 - Statistical Analysis
 - Trend Analysis
 - KPI Reporting
 - Git / GitHub

EXPERIENCE

ScaleUpGlobally | Growth Analyst

[Apr 2025 - Present]

- Analyzed performance metrics, engagement trends, and conversion data across 50+ marketing ad campaigns to identify optimization opportunities.
- Performed KPI reporting, exploratory data analysis, and A/B testing to support business optimization and decision-making.
- Created analytical reports and performance summaries for 10+ Instagram and YouTube clients to track audience growth and campaign performance.
- Worked with structured datasets while ensuring data accuracy, reporting consistency, and performance tracking.

ScaleUpGlobally | Freelance Analytics & Reporting

[Project-Based Engagements | Aug 2023 – Mar 2025]

- Analyzed audience growth, engagement, and campaign performance metrics across Instagram and YouTube accounts.
- Created performance reports and dashboards to track trends, audience behavior, and campaign effectiveness.
- Identified optimization opportunities through data-driven analysis to support content and marketing decisions.

PROJECTS

DarkStoreIQ – Operations & Sales Analytics Dashboard | Power BI, Python, SQL, Data Modeling.

[GitHub Link - github.com/prakash-sakshi/DarkStoreIQ].

- Built a 3-page Power BI interactive dashboard analyzing 220K+ orders and 780K+ inventory records.
- Designed a star schema data model with 4 fact tables and 4 dimension tables for optimized reporting performance.
- Performed exploratory data analysis and data validation on 1M+ records using Python and Pandas.
- Developed SQL queries and Power BI KPI measures for revenue, inventory tracking, procurement, and operational analysis.
- Identified 18K+ low-stock cases and demand patterns to support operational insights and business decision-making.

Health Insurance Customer Churn Analysis | MySQL, SQL, Power BI

[GitHub Link - github.com/prakash-sakshi/Health-Insurance-Customer-Churn].

- Designed a relational insurance database with 400K+ records across 6 interconnected tables using MySQL.
- Performed SQL-based churn, retention, and revenue-at-risk analysis on insurance policy data.
- Built a 4-page Power BI dashboard covering Executive Overview, Customer Churn, Claims & Payments, and Retention Strategy.
- Identified ₹230M+ revenue at risk and key churn drivers including claims outcomes, payment behavior, and customer satisfaction.

CERTIFICATE

- Google Data Analytics Professional Certificate - Coursera

EDUCATION

- B.Tech in Computer Science Engineering (CGPA: 7.0/10) - IIMT College of Engineering, AKTU (2019 - 2023)
